SIGN UP OR LOG IN

MYDESIGNER.GG

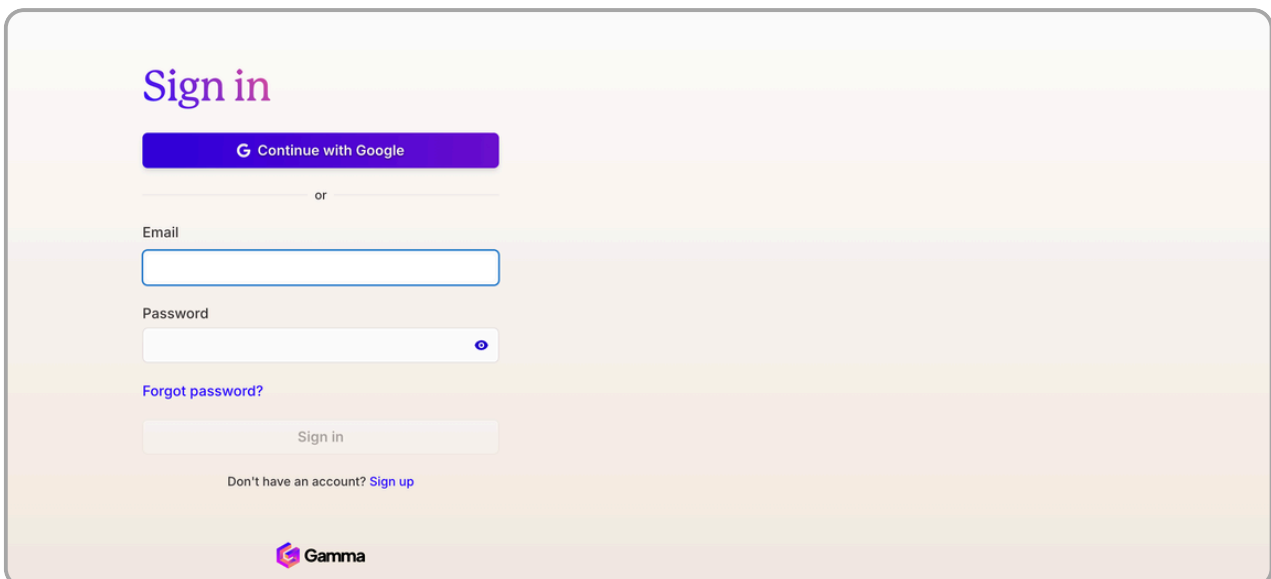

1. Go to Gamma.app.

Open your browser and navigate to Gamma's official website.

2. Create an Account or Log In.

If you don't already have an account, sign up using your email or a social login. If you have an account, just log in.

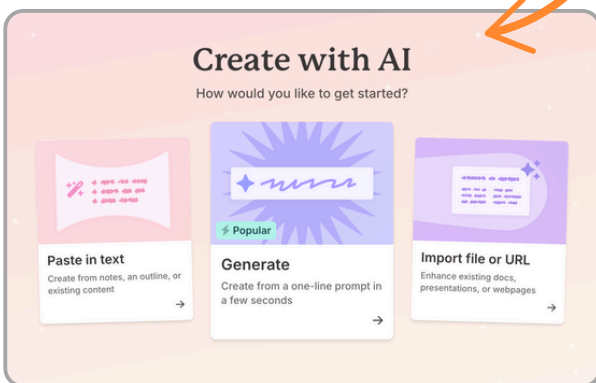

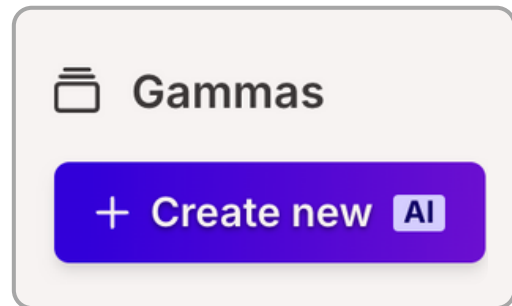

MyDesigner

STEP
2

CREATE NEW PROJECT

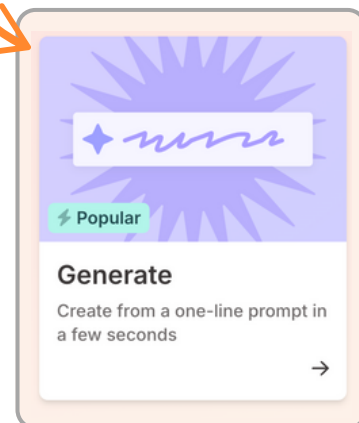

MYDESIGNER.GG

1. Once logged in, navigate to the dashboard and click “Create New AI”.

2. Choose how you want to create your website (Generally let the AI do all the work for you).

We will use Generate option which is the fastest way to create a website.

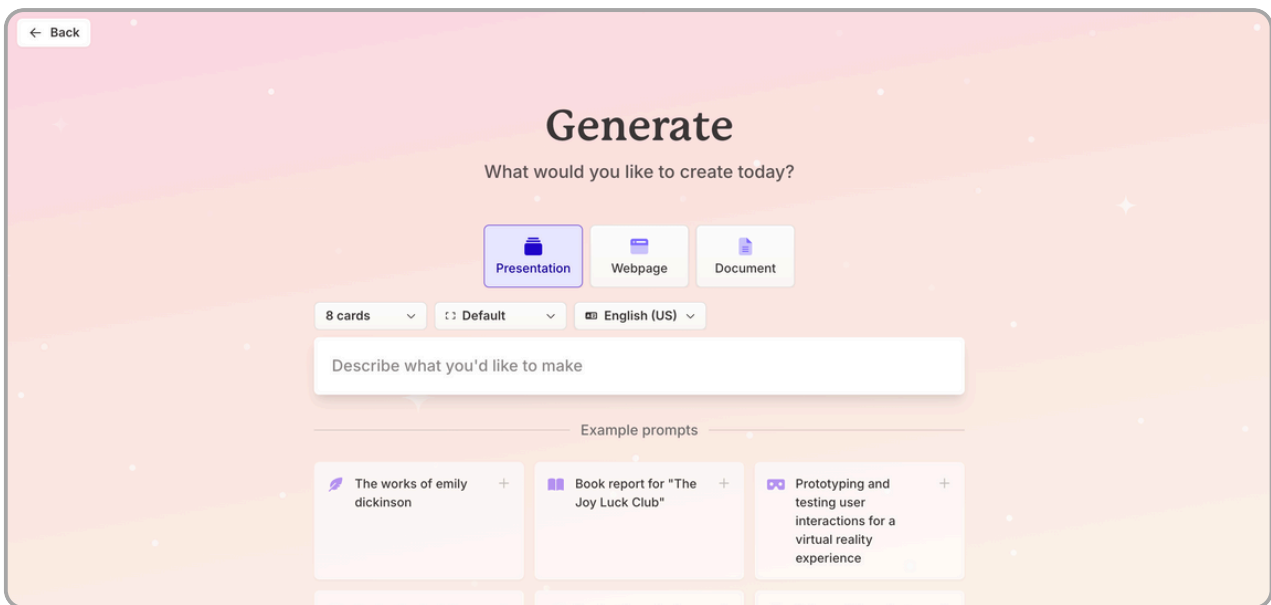

You can also use 'Paste in Text' OR 'Import file or URL' depending on your use.

We will describe on how to use these options in the later part of the document.

3. Click on Generate and select Webpage as shown below and add in your custom prompt for the tool to automatically create a webpage related to your content.

In this case we add a prompt to create a website for a coffee shop.

We have used the below prompt in this case that itself was generated by CHATGPT. 2 prompts that we used in CHATGPT resulted in the below prompt.

PROMPT 1

"Please give me prompt suggestions for creating a website for an attractive coffee shop"

This resulted in a huge list of prompts for every page. Moving further we asked CHATGPT to combine all prompts to create a single page website.

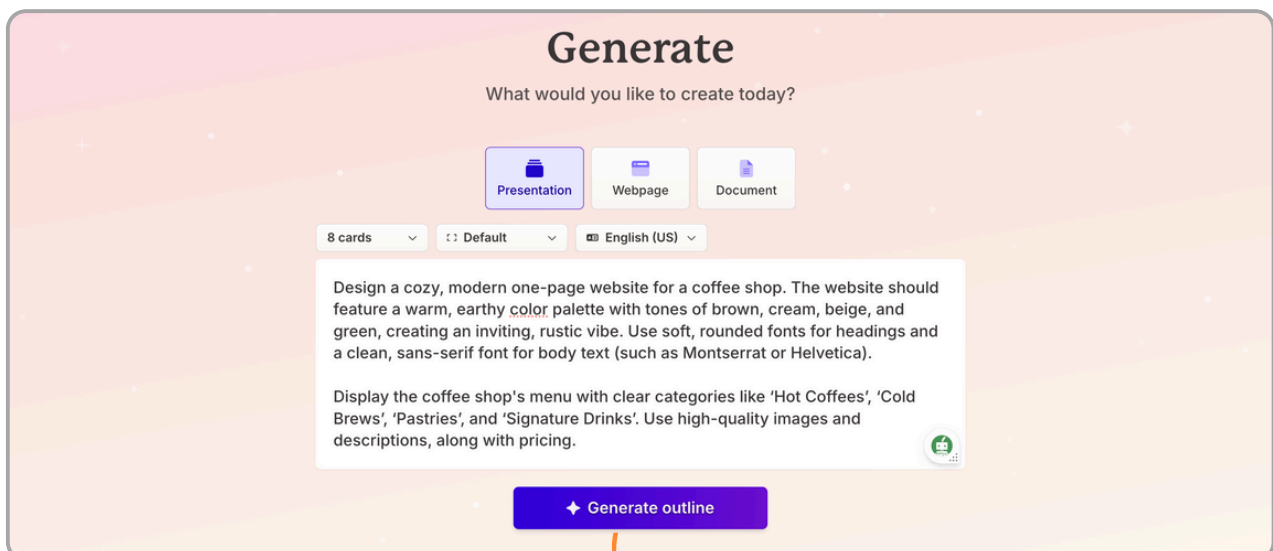

PROMPT2

Combine all the above prompts in one prompt for a single page website"

Below is the result.

Design a cozy, modern one-page website for a coffee shop. The website should feature a warm, earthy color palette with tones of brown, cream, beige, and green, creating an inviting, rustic vibe. Use soft, rounded fonts for headings and a clean, sans-serif font for body text (such as Montserrat or Helvetica).

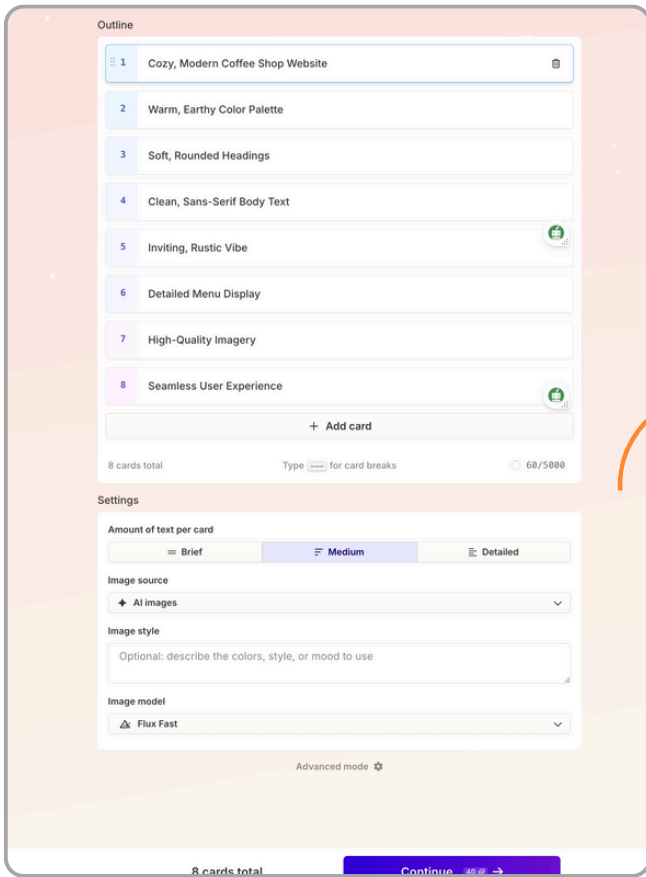

Display the coffee shop's menu with clear categories like 'Hot Coffees', 'Cold Brews', 'Pastries', and 'Signature Drinks'. Use high-quality images and descriptions, along with pricing.

Click on Generate outline.

★ Generate outline

Generate outline will generate you a full-fledged website content with related cards as shown below. You can play around with this to match with your requirement and suite your need.

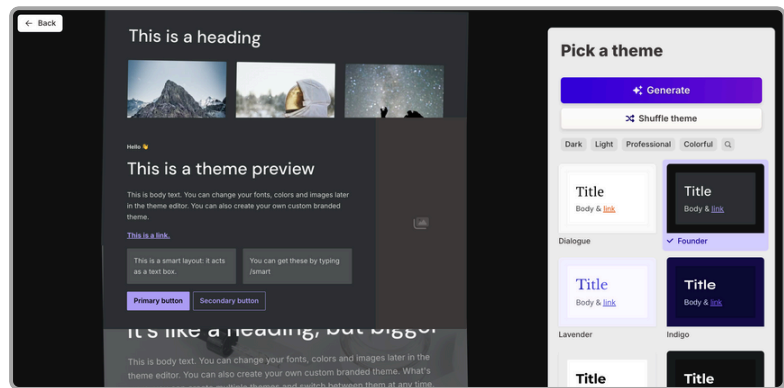

You can also adjust the settings as per your convenience and likeability.

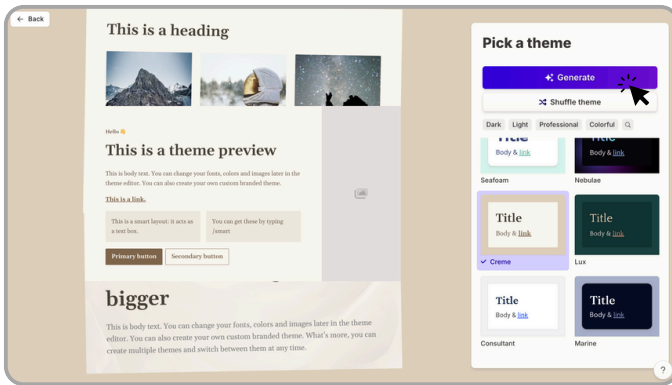

Click Continue to move forward to the next step.

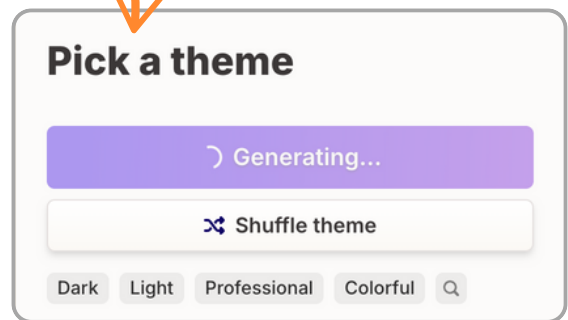

At the next step you need to Pick a Theme.

We have selected the below theme

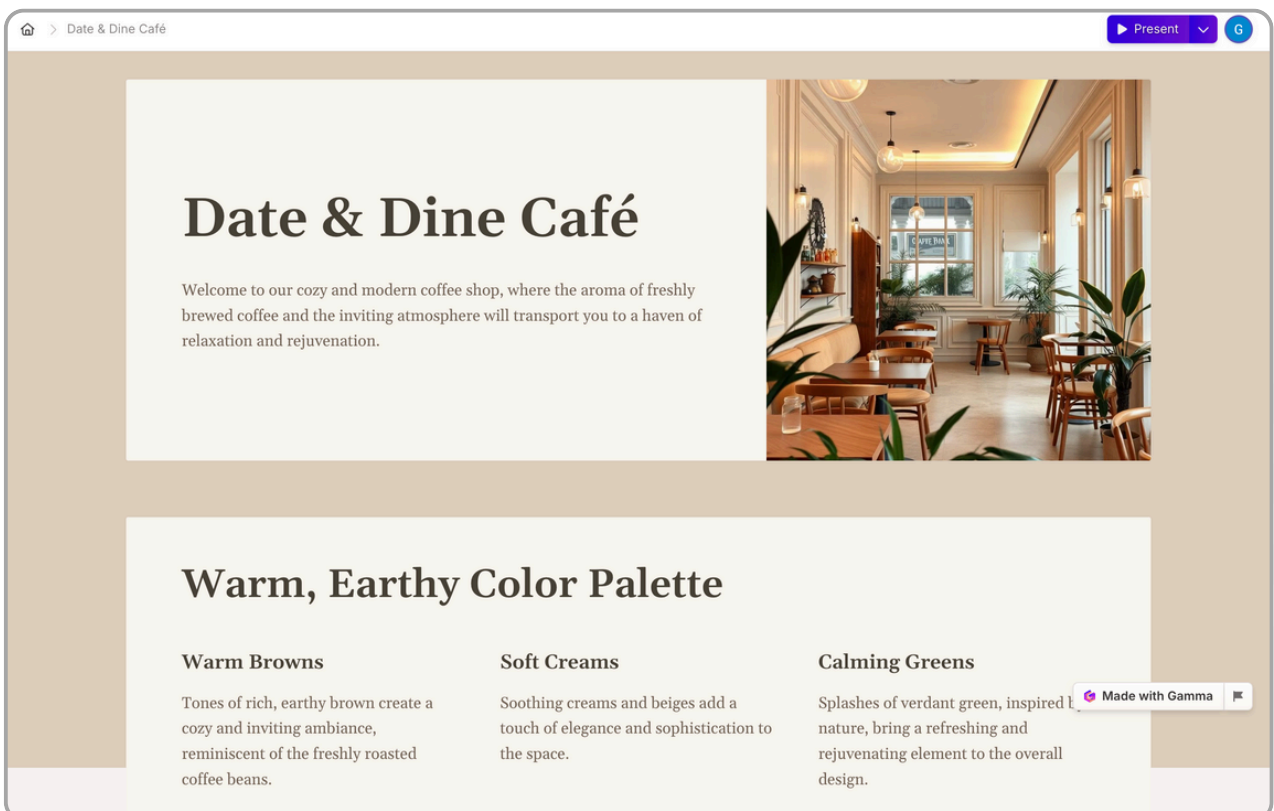

Then click on Generate.

It will show as Generating

And Voila – Your Website is ready for **'Date & Dine Café'**

Soft, Rounded Headings and Clean Body Font

- 1 **Heading Style**
Soft, rounded headings create a welcoming and approachable feel, complementing the cozy atmosphere.
- 2 **Body Text**
A clean, sans-serif font, such as Montserrat or Helvetica, ensures easy readability and a modern aesthetic.
- 3 **Harmonious Pairing**
The combination of soft headings and a clean body font striking a perfect balance between tradition and modernity.

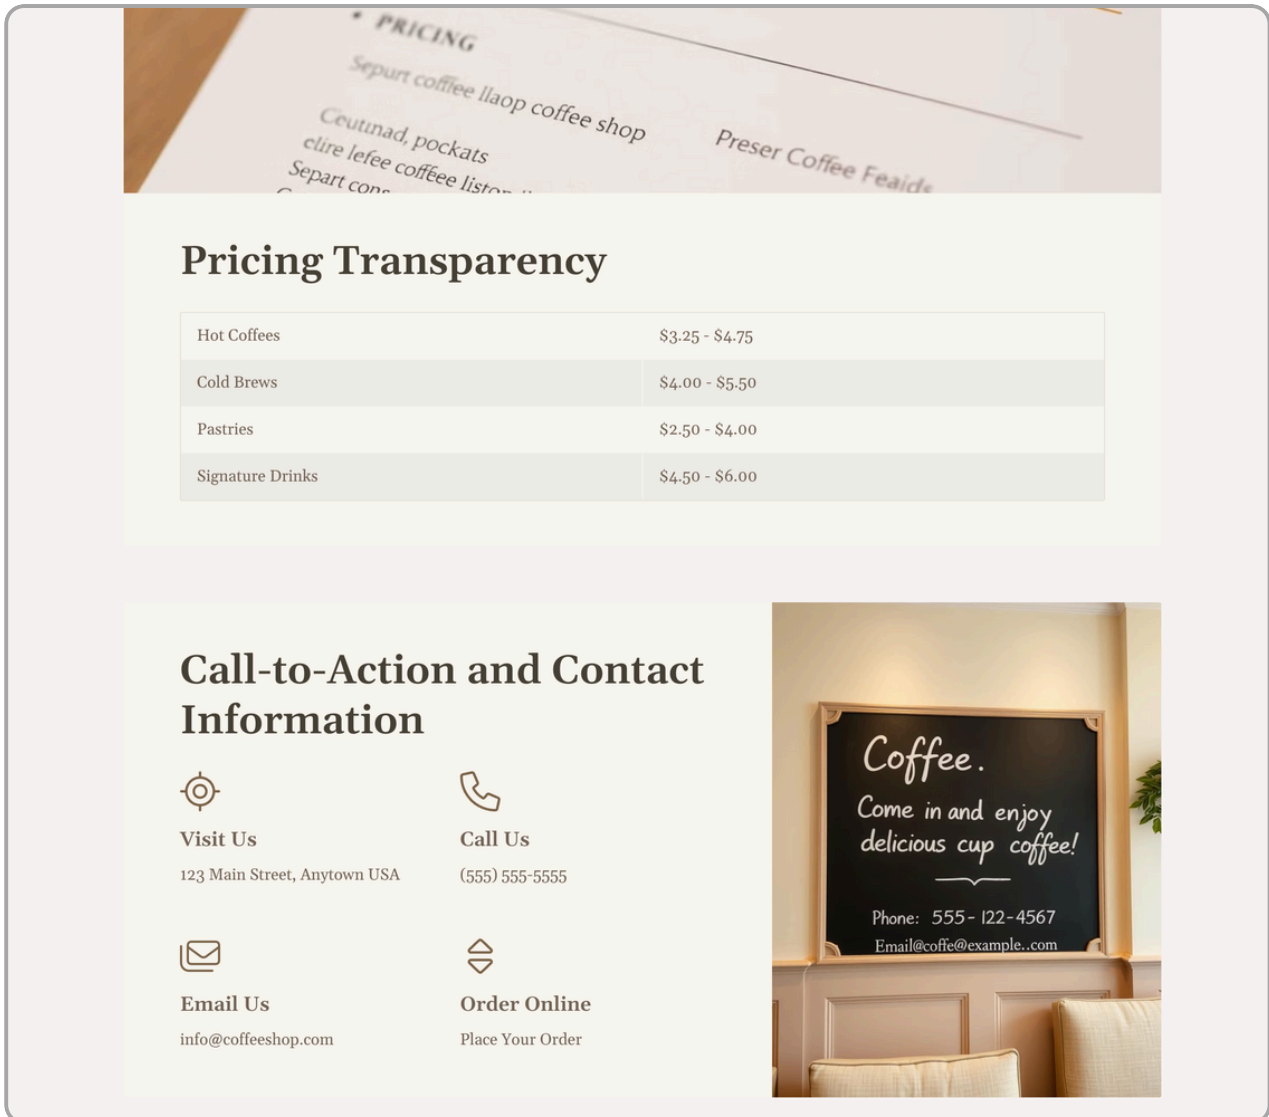

Inviting, Rustic Vibe

- Wooden Accents**
Natural wood elements, such as tables and chairs, create a warm, rustic ambiance.
- Exposed Brick**
Exposed brick walls add a touch of industrial charm, complementing the cozy atmosphere.
- Warm Lighting**
Soft, inviting lighting fixtures cast a warm glow, enhancing the overall inviting atmosphere.
- Greenery**
Strategically placed plants and greenery bring a touch of nature and freshness to the space.

Clearly Organized Menu

- 1 **Hot Coffees**
Explore our selection of expertly crafted hot coffee beverages, each with its own unique flavor profile.
- 2 **Cold Brews**
Cool down with our refreshing cold brew offerings, perfect for those warm summer days.
- 3 **Pastries**
Indulge in our delectable selection of freshly baked pastries, made with the finest ingredients.
- 4 **Signature Drinks**

You can view this website we just created here
<https://bit.ly/datendinecafe>

The above url was produced by url shortener using
<https://app.bitly.com/>

How to use <https://app.bitly.com/> is detailed in the document below.

6
STEP

SETUP YOUR WEBSITE
SHORT URL USING FREE
WEBSITE SHORTENER.

[MYDESIGNER.GG](https://mydesigner.gg)

1. Login if you already have an existing account OR Sign up for FREE to <https://bitly.com/>

Once you've made your changes, click on the Present button on the top right hand corner of the screen to see how your website looks on desktop and mobile devices.

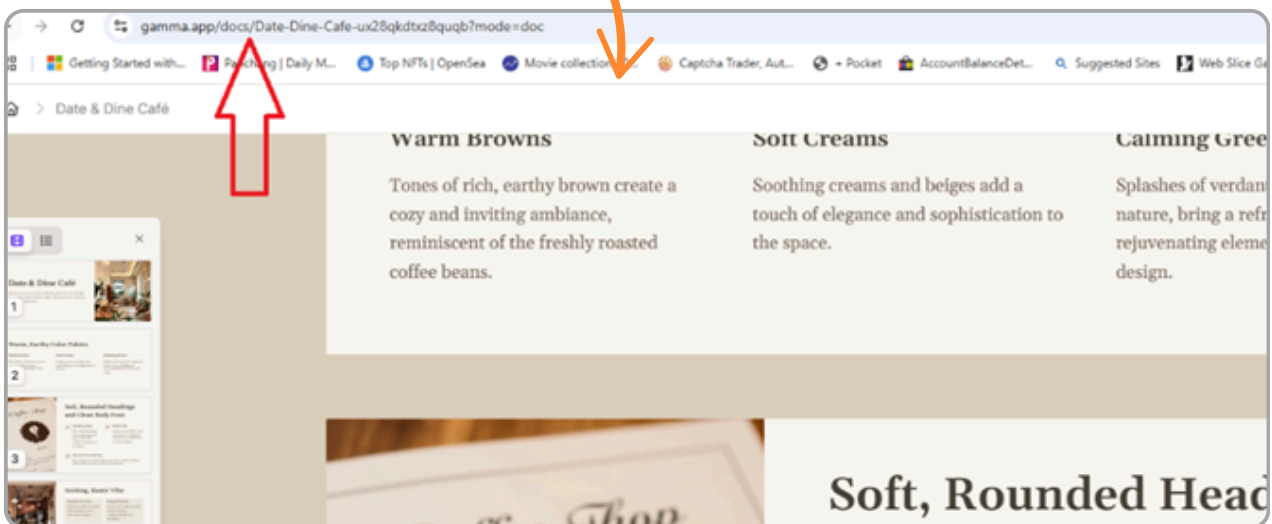

Always make sure create your account and sign in for keeping a track of your url.

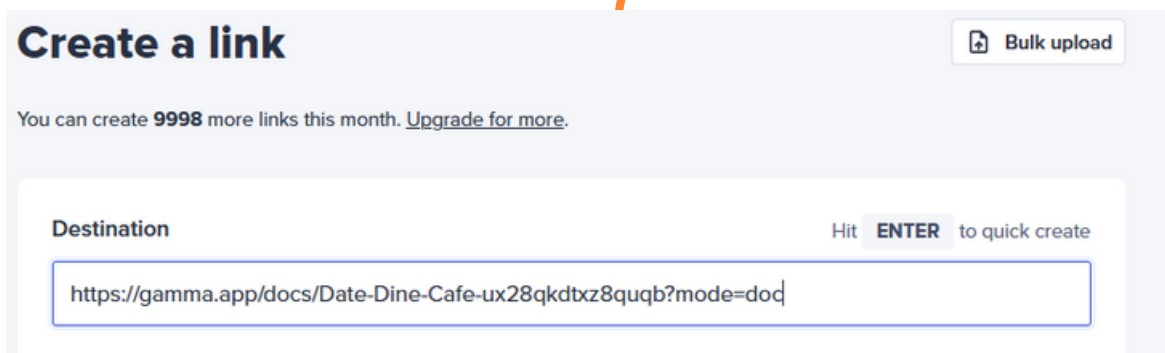

After you login click on create a link.

Then on the form below enter the details per your website name. For example in this case the name of our shop was Date & Dine Café.

1. Copy the url that was generated gamma.app site when you created your own website.

2. And then paste in the Destination field as shown below

3. Next in the Custom back-half field you can use the name of your shop/website for a close match OR use a completely different name. If that name is available it will assign it to you else you have to change of the letters to make it unique for yourself.

STEP

**TO BUILD A WEBSITE
USING**

“PASTE IN TEXT” OR IMPORT FILE OR URL

MYDESIGNER.GG

We are very happy that you reached this section of the document.

The “paste in text” or Import File or URL methods are optional and can be used for advanced users or programmers.

The above 2 methods are technical in nature and require special expertise and a bit of training on that required expertise.

Please reach out to us on hi@sukratu.co with the subject **“Ebook required on Paste in Text OR Import file or URL”** and we will send you the required information.

Please mention your Name, Country, Pincode and Phone Number in the email.

A graphic consisting of several concentric circles in shades of orange, centered at the top of the page.

MyDesigner

THANK YOU
